

CTPAT Statement of Support

Westwood Shipping Lines is a proud member of the Customs-Trade Partnership Against Terrorism (CTPAT) community and is committed to supply chain security. Westwood has been a CTPAT certified Sea Carrier since September of 2003.

CTPAT is a joint government-business initiative supported by Department of Homeland Security and U.S. Customs and Border Protection. The objective of CTPAT is to improve global supply chain security by developing voluntary cooperative relationships with various supply chain partners.

Our executive team fully supports the CTPAT minimum-security criteria (MSC) and we also support the various teams at Westwood that are responsible for maintaining and executing our security protocols.

CTPAT brings the responsibility for supply chain security to every individual. Westwood Shipping Lines encourages all our business partners to enroll in this program and all Westwood employees are expected to fully adhere to our CTPAT-aligned security processes. We are fully committed to supporting the mission of CTPAT and sharing the benefits of participation with our customers.
